

REMARKS

Claims 1-6, 17 and 19 are pending in this application.

Claim 1 is an independent claim from which the remaining claims depend.

Entry of Amendment

The above amendment should be entered because it places the application in condition for allowance. The amendment cancels the objected to claims and also modifies the wording of base claim 1. The amendment to claim 1 still includes the subject matter that the Examiner considered allowable in claim 1 as set forth in Section 12 of the Office Action.

Reply to Objections

Claims 18 and 20 were objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

These claims have been canceled and the objection is moot.

Reply to Rejections

Claims 1-6, 17 and 19 were rejected under 35 USC 112 first paragraph, as failing to comply with the written description requirement. Claim 1 has been amended and now does comply with 35 USC 112 first paragraph. Also the dependent claims comply with 35 USC 112 first paragraph in view of the amendments to the base claim.

The Examiner is requested to reconsider and withdraw the rejection of the claims under 35 USC 112 first paragraph.

Second Rejection

Claims 1-6 are rejected under 35 USC 112 second paragraph as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention. This rejection in view of the amendment to base claim 1 is traversed.

Base claim 1 has been amended and now does comply with 35 USC 112 second paragraph.

The Examiner is requested to reconsider and withdraw the rejection of the claims under 35 USC 112 second paragraph.

Third Rejection

Claims 7-16, 18 and 20 were rejected under 35 USC 103(a) as being unpatentable over WO '400 (WO91/03400). These claims have been canceled and the rejection is now moot.

Allowable Subject Matter

In Section 12 of the Office Action, the Examiner indicated that claims 1-6, 17 and 19 would be allowable if rewritten or amended to overcome the rejections under 35 USC 112. Claim 1 has been amended and complies with 35 USC 112. The dependent claims are considered patentable at least for the same reasons as base claim 1.

Foreign Priority

In section 1 of the Office Action, the Examiner indicates that a certified copy of the Israel 132708 has not been received. A review of the record indicates that the International Bureau did forward the Israel 132708 to the U.S. Patent Office. Enclosed for example and marked Attachment A of three pages (1) Is notification from the Patent Office dated January 4, 2002 indicating that the foreign applications were noted. (2) Is a copy of the International Publication front page indicating that the priority data regarding Israel 132708 was submitted. (3) Is a copy of a letter from the International Bureau indicating that the priority documents were submitted including Israel 132708.

The Patent Office is requested to review its records and files for the alleged missing Israel document 132708.

Conclusion

Should there be any outstanding matters that need to be resolved in the present application, the Examiner is respectfully requested to contact Elliot Goldberg (Reg. No. 33,347) at the telephone number of the undersigned below, to conduct an interview in an effort to expedite prosecution in connection with the present application.

If necessary, the Commissioner is hereby authorized in this, concurrent, and future replies, to charge payment or credit any overpayment to Deposit Account No. 02-2448 for any additional fees required under 37 C.F.R. §§ 1.16 or 1.17; particularly, extension of time fees.

A method for packaging a product in a hermetically sealed container having a cup-shaped rigid or semi-rigid body with a rim fitted with a closure, the method comprising introducing the product into the cup-like shaped body (106). Forming an isolated space (204) with a gas inlet (134) and a gas outlet (112), the space defined between the body and a closure-forming member (200) adjacent to and with a clearance from the rim (107). Introducing a replacement gas through the inlet to replace at least a substantial portion of gas originally contained in the isolated space, and displacing at least one of the body or the closure-forming member towards the other of the two members to close the clearance and to attach the closure-forming member to the rim, and hermetically attaching the two to one another to form a gas-tight seal.
